- 97 – THE BENEFIT FOR THIS SERVICE IS INCLUDED IN THE PAYMENT/ALLOWANCE FOR ANOTHER SERVICE/PROCEDURE THAT HAS ALREADY BEEN ADJUDICATED.
- W1 – WORKERS' COMPENSATION JURISDICTIONAL FEE SCHEDULE ADJUSTMENT.

Issues

1. What is the applicable rule for determining reimbursement for the disputed services?
2. What is the recommended payment amount for the services in dispute?
3. Is the requestor entitled to reimbursement?

Findings

1. This dispute relates to facility services performed in an outpatient hospital setting with reimbursement subject to the provisions of 28 Texas Administrative Code §134.403, which requires that the reimbursement calculation used for establishing the maximum allowable reimbursement (MAR) shall be the Medicare facility specific amount, including outlier payment amounts, determined by applying the most recently adopted and effective Medicare Outpatient Prospective Payment System (OPPS) reimbursement formula and factors as published annually in the Federal Register with the application of minimal modifications as set forth in the rule. Per §134.403(f)(1), the sum of the Medicare facility specific reimbursement amount and any applicable outlier payment amount shall be multiplied by 200 percent, unless a facility or surgical implant provider requests separate reimbursement of implantables. Review of the submitted documentation finds that separate reimbursement for implantables is not applicable.
2. Under the Medicare Outpatient Prospective Payment System (OPPS), each billed service is assigned an Ambulatory Payment Classification (APC) based on the procedure code used, the supporting documentation and the other services that appear on the bill. A payment rate is established for each APC. Depending on the services provided, hospitals may be paid for more than one APC per encounter. Payment for ancillary and supportive items and services, including services that are billed without procedure codes, is packaged into payment for the primary service. A full list of APCs is published quarterly in the OPPS final rules which are publicly available through the Centers for Medicare and Medicaid Services (CMS) website. Reimbursement for the disputed services is calculated as follows:
 - Procedure code 36415 has a status indicator of A, which denotes services paid under a fee schedule or payment system other than OPPS. Per 28 Texas Administrative Code §134.403(h), for outpatient services for which Medicare reimburses using fee schedules other than OPPS, reimbursement is made using the applicable Division fee guideline in effect for that service on the date the service was provided. Facility payment for the technical component of this service is calculated according to the Medical Fee Guideline for Professional Services, §134.203(e)(1). The fee listed for this code in the Medicare Clinical Fee Schedule is \$3.00. 125% of this amount is \$3.75
 - Procedure code 82565 has a status indicator of A, which denotes services paid under a fee schedule or payment system other than OPPS. Per 28 Texas Administrative Code §134.403(h), for outpatient services for which Medicare reimburses using fee schedules other than OPPS, reimbursement is made using the applicable Division fee guideline in effect for that service on the date the service was provided. Facility payment for the technical component of this service is calculated according to the Medical Fee Guideline for Professional Services, §134.203(e)(1). The fee listed for this code in the Medicare Clinical Fee Schedule is \$7.22. 125% of this amount is \$9.02
 - Procedure code 72125 has a status indicator of Q3, which denotes conditionally packaged codes that may be paid through a composite APC. If OPPS criteria are met, this service is assigned to composite APC 8005 or 8006. This service meets the criteria for composite payment. A service that is assigned to a composite APC is a major component of a single episode of care. The hospital receives one payment through a composite APC for multiple major separately identifiable services. Payment for any combination of designated procedures performed on the same date is packaged into a single payment. If a claim includes a composite payment that pays for more than one otherwise separately paid service, the

charges for all services included in the composite are summed up to one line. To determine outlier payments, a single cost for the composite APC is estimated from the summarized charges. Total packaged cost is allocated to the composite line-item in proportion to other separately paid services on the claim. The payment for composite services is calculated below.

- Procedure code 76376 has a status indicator of N, which denotes packaged items and services with no separate APC payment; payment is packaged into the reimbursement for other services, including outliers.
- Procedure code 70450 has a status indicator of Q3, which denotes conditionally packaged codes that may be paid through a composite APC. If OPPS criteria are met, this service is assigned to composite APC 8005 or 8006. This service meets the criteria for composite payment. - Procedure code 71260 has a status indicator of Q3, which denotes conditionally packaged codes that may be paid through a composite APC. If OPPS criteria are met, this service is assigned to composite APC 8006. This service meets the criteria for composite payment. To determine outlier payments, a single cost for the composite APC is estimated from the summarized charges. Total packaged cost is allocated to the composite line-item in proportion to other separately paid services on the claim. The payment for composite services is calculated below.
- Procedure code 99284 has a status indicator of Q3, which denotes conditionally packaged codes that may be paid through a composite APC. If OPPS criteria are met, this service is assigned to composite APC ; however, review of the submitted information finds that the criteria for composite payment have not been met. Therefore, this line may be paid separately. This line is assigned status indicator V, which denotes a clinic or emergency department visit paid under OPPS with separate APC payment. These services are classified under APC 0615, which, per OPPS Addendum A, has a payment rate of \$222.58. This amount multiplied by 60% yields an unadjusted labor-related amount of \$133.55. This amount multiplied by the annual wage index for this facility of 0.9561 yields an adjusted labor-related amount of \$127.69. The non-labor related portion is 40% of the APC rate or \$89.03. The sum of the labor and non-labor related amounts is \$216.72. The cost of these services does not exceed the annual fixed-dollar threshold of \$2,025. The outlier payment amount is \$0. The total Medicare facility specific reimbursement amount for this line is \$216.72. This amount multiplied by 200% yields a MAR of \$433.44.
- Procedure code J7030 has a status indicator of N, which denotes packaged items and services with no separate APC payment; payment is packaged into the reimbursement for other services, including outliers.
- Procedure code Q9967 has a status indicator of N, which denotes packaged items and services with no separate APC payment; payment is packaged into the reimbursement for other services, including outliers.
- Per Medicare policy, procedure code G0390 is subject to 28 Texas Administrative Code §134.403(d) that requires, for coding, billing, reporting, and reimbursement of covered health care, system participants shall apply Medicare payment policies in effect on the date a service is provided with any additions or exceptions as specified in the rule. Review of the submitted documentation finds that the procedure code was not submitted in accordance with Medicare Claims Processing Manual Chapter 4 - Part B Hospital, Chapter 160. Therefore, this service does not meet the requirements of §134.403(d). Reimbursement cannot be recommended.
- Procedure codes 72125, 70450, and 71260 have a status indicator of Q3, which denotes conditionally packaged codes that may be paid through a composite APC. A service that is assigned to a composite APC is a major component of a single episode of care. The hospital receives one payment through a composite APC for multiple major separately identifiable services. Payment for any combination of designated procedures performed on the same date is packaged into a single payment. These services

are assigned to composite APC 8006, for computed tomography (CT) services including contrast. If a "without contrast" CT procedure is performed on the same date of service as a "with contrast" CT, APC 8006 is assigned rather than APC 8005. If a claim includes a composite payment that pays for more than one otherwise separately paid service, the charges for all services included in the composite are summed up to one line. To determine outlier payments, a single cost for the composite APC is estimated from the summarized charges. Total packaged cost is allocated to the composite line-item in proportion to other separately paid services on the claim. This line is assigned status indicator S, which denotes a significant procedure, not subject to multiple-procedure discounting, paid under OPPS with separate APC payment. These services are classified under APC 8006, which, per OPPS Addendum A, has a payment rate of \$628.61. This amount multiplied by 60% yields an unadjusted labor-related amount of \$377.17. This amount multiplied by the annual wage index for this facility of 0.9561 yields an adjusted labor-related amount of \$360.61. The non-labor related portion is 40% of the APC rate or \$251.44. The sum of the labor and non-labor related amounts is \$612.05. The cost of these services does not exceed the annual fixed-dollar threshold of \$2,025. The outlier payment amount is \$0. The total Medicare facility specific reimbursement amount for this line is \$612.05. This amount multiplied by 200% yields a MAR of \$1,224.10.

3. The total allowable reimbursement for the services in dispute is \$1,670.31. This amount less the amount previously paid by the insurance carrier of \$2,049.09 leaves an amount due to the requestor of \$0.00. No additional reimbursement can be recommended.

Conclusion

For the reasons stated above, the Division finds that the requestor has not established that additional reimbursement is due. As a result, the amount ordered is \$0.00.

ORDER

Based upon the documentation submitted by the parties and in accordance with the provisions of Texas Labor Code §413.031, the Division has determined that the requestor is entitled to \$0.00 reimbursement for the disputed services.
